

eBook Submission Guidelines

Helping to repurpose your content!

You will need to:

- Assign a new ISBN to the eBook and upload that information to the Midpoint site.
- eBooks currently have a different pricing structure than regular books. The current trend is \$4.99 for a PB book and \$9.99 HC. However, the final decision is up to you.

In addition, we need three different documents:

It is important that the pages of the eBook line up like a print book – even pages on the left.

1. a PDF – compatible with Acrobat 5.0/6.0 that includes the cover image first, followed by the interior of the eBook itself.

OR*

2. a PDF – compatible with Acrobat 5.0/6.0 that includes the cover image first, followed by one blank page then the interior of the eBook itself

[*Whichever of these combos will have the pages of the eBook line up like a print book – even pages on the left.]

3. a PDF – compatible with Acrobat 5.0/6.0 that only includes the interior of the eBook itself (no cover image included)

4. a JPG of the Cover Image (at least 300 dpi, 510 x 680 pixel)

You can submit this information by email or on a CD. Also, if you are converting your titles to other formats - like Mobi pocket or ePub - we can use those as well.

Your PDF's need to be formatted with these requirements:

- In the “Document Properties,” describe the title as the title of the book. “Document Properties” title is different from the “File Name” title, even though the “file name” should also contain the title of the book.
- A “Table of Contents” needs to be applied to every PDF.
- The page numbers of the PDF should match the page numbers for the book. (ie: the cover image should have a page number of “C” rather than “1.” Intro material can be labeled as pages “i, ii, iii, iv, etc”)
- Make sure to EMBED all fonts.
- All security setting should be OFF. Do not send files that require a password.
- Set the “Subset Embedded Fonts when Percent of Characters if Less Than” to 100%
- You files should be less than 10MB in size.
- The resolution minimum of the files should be no less than 150dpi.
- All images must be single layer graphics

Recommendations from eBooks vendors:

- You are encouraged to include hyperlinks to the chapters/sections from the table of contents.
- Electronic bookmarks are helpful.
